

Long Term Care at BRMC

Quality of Care and Quality of Life

For more than 80 years, families have trusted Bergen Regional Medical Center to provide comprehensive, high-quality long term care services for their loved ones.

As a full service and accredited medical center, Bergen Regional provides nursing care, as well as access to specialized onsite physicians, 24 hours a day, 365 days a year. Because our facility is attached to an acute care and psychiatric hospital, if our residents experience medical or mental health emergencies day or night, the comprehensive care they need is *always just an elevator ride away*.

The Long Term Care Division at BRMC is accredited by the Joint Commission. Less than 6% of LTC facilities nationwide pursue and receive Joint Commission accreditation.

For more information about referring a patient or resident, arranging a tour or the admission process, please contact the Long Term Care Admissions Office
